PROFESSIONAL SUMMARY

Software Engineer and Kazan Federal University graduate with hands-on experience building AI-powered educational systems, mobile applications, and backend services. Built Juanito, a multilingual learning assistant using local LLMs, personalized learning flows, speech tools, and Python services. Strong in translating product requirements into structured, usable software.

TECHNICAL SKILLS

Programming	Python, SQL, Java, Go, Dart, JavaScript
AI / NLP	LLMs, prompt engineering, RAG, Ollama, Whisper STT, TTS, conversational AI
Backend	REST APIs, client-server architecture, SQLite, JSON storage, database design
Frontend / Mobile	Flutter, Gradio, Telegram Bot API, Vue, HTML/CSS
Tools	Git, GitHub, Linux/macOS, VS Code, local AI deployment
Languages	Spanish native, English B2-C1, Russian B1

SELECTED PROJECTS

Juanito - AI Assistant for Learning Spanish

Diploma project | Python, Ollama, SQLite, Gradio, Telegram Bot API, Whisper/TTS | github.com/AmyArgotti/juanito-spanish-assistant

- Built an AI-assisted Spanish-learning platform for Russian-speaking users with translation, grammar explanations, vocabulary, quizzes, reminders, and conversational tutoring.
- Integrated local LLM workflows through Ollama and designed personalized learning flows using saved vocabulary, flashcards, and learner progress.

Expense Tracker - Flutter Finance Application

Mobile project | Dart, Flutter, SQLite, MVVM, SharedPreferences | github.com/AmyArgotti/expense-tracker-app

- Developed a mobile expense tracking app for income, expenses, categories, accounts, and local transaction storage.
- Implemented SQLite persistence, MVVM architecture, adaptive navigation, state restoration, geolocation, notifications, receipt photos, and biometric protection.

Restaurant Loyalty System

Freelance project | Python, SQL, APIs

- Developed backend business logic for customer tracking, loyalty points, and restaurant data workflows.
- Applied database-oriented thinking to support repeat customer management and operational records.

EDUCATION

Kazan Federal University (KFU)

Bachelor of Science in Software Engineering | 2022 - 2026 | Kazan, Russia

Diploma / Thesis: Development of an AI Assistant for Learning Spanish Using Large Language Models

Relevant areas: Artificial Intelligence, Software Engineering, Database Systems, Backend Development, NLP & LLM Applications, Human-Computer Interaction, Algorithms & Data Structures.
